Which form factor meets your business needs? In today's business environment, there is no one-size-fits-all solution. Use this quick guide to determine which form factor is right for you.

**Do you need a portable device?**

- **NO**
  - **Do you want touch capabilities?**
    - **NO**
      - Traditional Desktop PC
    - **YES**
      - Mini PC
  - **YES**
    - All-in-One PC

- **YES**
  - **Do you want the flexibility of using a tablet or a laptop in a single device?**
    - **YES**
      - 2 in 1 Device
    - **NO**
      - Do you need maximum (hand-carried) portability with touch?
        - **YES**
          - Tablet
        - **NO**
          - Laptop

**Desktop Device Options**

- **Traditional Desktop PC**
  - Designed for users who want a range of performance options available in an expandable, stationary form factor.
  - Ideal for current desktop PC users who want the convenience of a smaller device with proven Intel® processor-based performance.
  - A cost-effective, space-saving design with ultralow power consumption and the flexibility to use multiple monitors.

- **Mini PC**
  - Ideal for users who want a stationary form factor with modern touch capabilities.
  - Stylish and sleek compact design, ideal for customer-facing locations.
  - The highly portable All-in-One offers the flexibility of touch and multitouch capabilities for easier collaboration.

- **All-in-One PC**
  - Ideal for users who want the hand-carried portability of a tablet with the performance capabilities of a laptop.
  - Available as a convertible device or a detachable model, great for sharing and presenting content.
  - Offers multitasking with a long battery life.
  - Also available as a sleek Ultrabook™ device, available in a variety of screen sizes and lightweight designs, all with longer battery life.

**Mobile Device Options**

- **2 in 1 Device**
  - A unique, ultramobile device for users who want maximum (hand-carried) portability with touch.
  - Offers multitasking with a long battery life.
  - Also available as an Ultrabook™, which is perfect for users who want an integrated keyboard with the option for touch capabilities.

- **Tablet**
  - Ideal for users who want a thin, light, portable device with long battery life.
  - Delivers responsive performance for users who are on the go.
  - Ideal for sharing or presenting content with customers, clients, or colleagues.
  - Mobilizes your enterprise workflows and applications to keep users productive.
  - Available in a variety of screen sizes 7 inches and above.

- **Laptop**
  - The traditional laptop is great for users who need powerful performance capabilities.
  - Ideal for working in a variety of locations, such as at the office, at home, or on the go.
  - Also available as an Ultrabook™, which is perfect for users who want an integrated keyboard with the option for touch capabilities.
Intel® Processor Technology: What’s the Difference?

Whether you choose a 2 in 1 device based on the Intel® Core™ vPro™ processor, a tablet based on the Intel® Atom™ processor with the Windows* or Android* operating system, or a sleek mini PC, you can find the right solution with Intel® architecture-based devices.¹

Options Available in Intel® Processor Technology

Intel® Core™ vPro™ processors provide hardware-enhanced security² designed to help protect against today’s attacks, remote manageability to reduce costs, and powerful performance enhancements to increase productivity.¹

Intel® Core™ processors have the optimum performance to meet your business productivity needs today and tomorrow.

Intel® Atom™ processors deliver energy-efficient performance and extraordinary battery life that is ideally suited to business-ready tablets.
