The Intel® Server Chassis SC5299WS workstation chassis was designed specifically for this board. This combination offers an ideal solution for workstation applications such as CAD, modeling, electronic design automation, and animation.

**Features and Benefits**

- 64-bit Multi-core Intel® Xeon® processor improves performance and headroom, and provides scalability and system redundancy with multiple virtual applications.
- Eight fully buffered 533/667 MHz DIMMs increase capacity and performance.
- Three PCI Express* slots provide expansion headroom for the future.
- Integrated server management helps lower costs by improving baseline manageability.
- Up to six SATA 3 Gb/s ports
- Optional 4-port SAS supports next-generation enterprise-class SAS drives or lower-cost SATA drives.
- Dual Gb Ethernet increases network performance, with lower processor overhead.

---

**Product Overview**

The Intel® Workstation Board S5000XVN provides incredible performance and memory capacity for demanding workstation operations. This workstation board is ideal for customers needing server-class performance and reliability, in addition to high-end graphics. The S5000XVN is acoustically optimized to minimize distractions in shared environments.

The S5000XVN has a greater number of high-performance PCI slots and support for next-generation enterprise-class SAS drives and high-capacity SATA drives. Increased memory capacity and bandwidth improve headroom for future growth and deliver the performance and flexibility growing businesses need for the future.

**For more details on the Intel® Workstation Board S5000XVN visit:**[www.intel.com/design/servers/boards/s5000XVN/index.htm](http://www.intel.com/design/servers/boards/s5000XVN/index.htm)

**For more information on how to make the Intel® Workstation Board S5000XVN part of your server environment, please contact an Intel® Channel Partner Program participant.**

---

1. Requires OS and driver support.
2. Refer to [http://support.intel.com/support/motherboards/server/s5000xvn](http://support.intel.com/support/motherboards/server/s5000xvn) for up-to-date details on processors supported by each server board.
3. 1333 MHz support may require updates that may not be available at launch.
4. Support enabled by installing the AXXRAKSw5 may not be available at launch.
