

Clean Rooms and Dust

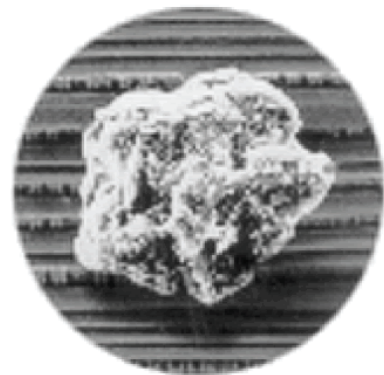

Clean air continuously flows from every pore of the ceiling and through the holes in the floor. All of the air in the clean room is replaced several times every minute.

Intel Fab workers wear Gore-Tex® semi-custom-fitted bunnysuits that must be worn in the Fab cleanroom.

An Intel technician holds a wafer for the camera. Each square on the wafer is called a "die" and each microprocessor will eventually become the "brain" of a PC system.

Microprocessor chip and dust magnified 1,000,000 times.
